PROFILE SUMMARY

Software Development Engineer (SDE-1) with hands-on experience in building scalable web applications using .NET and Angular. Strong knowledge of SQL Server database design and optimization, along with experience in developing RESTful APIs and user-friendly interfaces. Passionate about writing clean, efficient code and continuously improving technical skills.

EDUCATION

2019-2022

C.B.PATEL COMPUTER COLLEGE,
VNSGU

- Bachelor of Computer Application

2022-2024

SARVAJANIK COLLEGE OF
ENGINEERING AND TECHNOLOGY

- Master of Computer Application

SKILLS

FRONTEND

- HTML ,CSS, Bootstrap , JavaScript , TypeScript , Angular , XAML

BACKEND

- .NET Core , .NET MVC , C# , REST APIs ,Entity Framework , ADO.NET , MVVM

DATABASE

- MSSQL , MongoDB(Basic) , SQLite , Azure Data Studio , Firebase

TOOLS & PLATEFORMS

- GitLab , GitHub , Postman , Thunderclient , Visula Studio , Docker , Message Brokers

WORK EXPERIENCE

CodexLancers

8 JAN 2024 - PRESENT

SDE 1 (Full Stack Developer)

- I began my career at the company with a 6-month internship as a .NET trainee. After successfully completing my internship, I was promoted to a Junior Developer role, working with both Angular and .NET technologies. In this role, I have contributed to multiple projects by developing user interfaces, creating Web APIs in .NET, and continuously expanding my technical skills.
- I have taken on responsibilities such as handling client communication and helping ensure smooth project delivery. My efforts have contributed to the successful execution of projects and the overall growth of the company.

PROJECTS

DIZ

- Developed the DIZ project, a ride-hailing application quite similar to OLA, designed to provide pick-up and drop-off services.
- Technologies:** Angular , Firebase

Time Tracking Tool

- Built a project management app to track employee hours, assign tasks, and approve timesheets. Integrated Multi-Tenant support and Stripe for secure payment handling.
- Technologies:** .NET C#, MSSQL, Entity Framework, Angular, Stripe

LinkERP - Enterprise Inventory Management System

- Migrated LinkERP from Angular 7 to 17 and .NET 6 to 8, working on multiple inventory modules to ensure stability and performance. Developed and optimized SQL Server Stored Procedures and database objects, resolved build and dependency issues, and improved legacy code to support scalable enterprise inventory operations.
- Technologies:** .NET C#, MSSQL, Angular , Third Party Payment APIs
